eGlu Hub

eGlu HUB acts as a communication gateway between all the eGlu devices installed at home and your Wi-Fi router. It is a pluggable device and draws power from the AC wall outlet. A push button provided on the HUB can be used to re-configure the HUB if the Wi-Fi settings of your router are changed.

Manufacturer Information

Model no: EGHB01M
SKU no: EG-00-1-01-1-M
Warranty: One year limited

eGlu HUB
Quick User Guide

Technical Details

Power Input	220V-240V AC / 50Hz
Power Consumption	1W
Operating Temperature	0°C to 45°C
Wireless Protocol	865 - 867 MHz, Wi-Fi
Dimensions	82 X 48 X 45 mm
Weight	75 grams
Color	White

eGlu Door Sensor

Door Sensor helps in monitoring the opening and closing of the doors and windows. It also provides the real time state of the door/window on which it is installed. Apart from sensing door, it can also be used as a presence sensor or a remote button.

Manufacturer Information

Model no: EGDSO1N
SKU no: EG-016-1-03-1-N
Warranty: One year limited

eGlu In-wall Dual Switch

In-wall Dual Switch Module allows automation of regular lights, power sockets and fans. IWS-2S comes with two switches of 6A rating. It is installed behind the existing switch plate and works in parallel with the mechanical switches.

Manufacturer Information

Model No: EGIW07R
SKU no: EG-029-2-01-1-R
Warranty: One year limited

What's in the box

In-wall Dual Switch

eGlu In-Wall Dual Dimmer

In-wall Dual Dimmer Module allows automation of dimmable lights. IWS-2D comes with two dimmers of 0.5A rating each. It is installed behind the existing switch plate and works in parallel with the mechanical switches. Each dimmer can also be used as an ON/OFF switch as long as the load is less than 0.5A which is good enough for most of the LED lights.

Manufacturer Information

Model No: EGIW08N
SKU no: EG-030-1-01-1-N
Warranty: One year limited

eGlu Sensor Monitor HV

Sensor Monitor can convert a wired sensor like smoke detector, gas leak detector etc. into a wireless sensor. The wired sensor must have 'NO/NC' trigger output which should be connected to the Sensor Monitor. SMHV also provides a 12V/100mA DC output which can be used to power the wired sensor.

Manufacturer Information

Model no: EGSMO1R
SKU no: EG-019-1-01-1-R
Warranty: One year limited

eGlu Sensor Monitor LV

Sensor Monitor is designed to convert an existing low power sensor like Motion Glass Break Sensor etc. into a wireless sensor. The only requirement is that the wired sensor should have an 'NO/NC' trigger. SMLV can be powered from the same DC source which is powering the sensor, mostly a battery. SMLV can monitor three 'NO/NC' Inputs. 'NO' connection is recommended as it increases the battery life.

Manufacturer Information

Model no: EGSMO2N
SKU no: EG-020-1-01-0-N
Warranty: One year limited

eGlu Repeater

Repeater module extends the range of eGlu wireless network. Normally most of the AC powered eGlu products can be configured to act like a repeater. In some cases existing powered devices cannot be used as effective repeaters because of their position. In those cases, a stand alone repeater can be installed.
